User Stories and Related Scenarios

Story #1 – Home page of sport volunteer

Fundamental purpose of sport volunteer is servicing the sporter like marathon, national league, etc. Why do we need sport volunteers? Because all sport branches generally need maintenance. If regular events and activities are not organized, that sport may die. Like in the Corona. So, sport volunteers take the great responsibility about living all sports.

Let's say, Ziya is part of the Sport volunteer. He wants to list all events and their information, and he clicks on the event picture, The event page should be opened. He read all the information about the event, and he can decide whether to apply or not apply to the event. If he wants to apply for the event, his request is taken for evaluation by administration of sport volunteer. If he does not want to apply, he can attend the event and look at other events on the main page.

Also, he can control past events of his joined event. He can reach event photos or other specific information. Furthermore, after all sport events, generally gives certificates to sport volunteers. Ziya can be directed to link which includes sport volunteers' certificates.

Scenario #1 – Event page in sport volunteer application

Initial assumption:

Events are uploaded by the administration of sport volunteers. Users of Sport volunteer applications can apply to attend events after sign-in or sign-up.

Normal:

User clicks any event photo which he/she wants to apply, then sees full screen about event. In this page, general information is shared to users. Users read all detail of the event, then User can decide whether apply or not apply. The required information is given in the explanation of the event. If users don't have them and apply, probably get negative feedback after evaluation time for event. Therefore, explanations must be read carefully by users, even if applications have some control mechanism about information about event. After getting approval by administration for event, user must follow schedule of event. Already getting notification about approval and time but users must be careful about attending the event. Because, if he/she doesn't attend event after approval, his/her account probably puts in the blacklist and users never get any priority. In the middle of the paragraph, we talk about that some control mechanism. Let's clarify it. Generally, sport volunteers' activities have similar or same information about events. They are e-mail, phone number, name, surname, gender, location (city and district), and birth of date (calculating age). Therefore, the mobile application keeps this general information. If users don't complete successfully, don't apply

events, and face some necessary pop-up. To complete, users must sign-in or sign-up and fill in the information.

What can go wrong:

Control mechanism could not work very well, and Users can apply events even if they don't have any information in application or required information of events. In this way, the program does not crash because in admin panel users' approval are decided by managers or admins. It means that, they can prevent this mistake for functionality of application. However, on the other side, Users get rejected notification, which create unappropriated user because they wait for approval notification. The other main reason of application gains more volunteers to service all sport in the best way.

Scenario #2 – Academy page in sport volunteer application

Initial assumption:

Academy trainings are undertaken by the management of sports volunteers. Users of sports volunteer apps can apply to participate in training after logging in or registering.

Normal:

The user clicks on the photo of the training he wants to implement and sees the event in full screen. This page shares general information with users. Users read all the details of the event and can then decide whether to apply or not. Necessary information is given in the description of the incident. If users don't have these and apply, they will likely receive negative feedback after the evaluation period for the tutorial. For this reason, even if applications have some control mechanisms regarding event-related information, the explanations must be read carefully by users. After receiving approval from the management for the training, the user must follow the event program. Notifications are already received regarding confirmation and time, but users need to be careful about participating in the event. Because if he does not participate in the training after approval, his account will probably be blacklisted and users will not be given any priority. In the middle of the paragraph we are talking about some kind of control mechanism. Let's get this straight. In general, the activities of sports volunteers have similar or the same information about events. These; e-mail, phone number, name, surname, gender, location (city and district), date of birth (age calculation). Therefore, the mobile application stores this general information. If users don't complete it successfully, don't implement the tutorials and get some necessary pop-ups. To complete, users must log in or register and fill out the information.

What could go wrong:

The control mechanism does not work very well and users can apply events even if they do not have any knowledge in the application or the necessary information about the events. In this way, the program will not crash because the administrators or admins decide on the approval of the users in

the admin panel. This means that they can avoid this error in terms of the functionality of the application. But on the other hand Users receive rejected notification which creates inappropriate user because they are waiting for approval notification. Another main reason for applying is to gain more volunteers to serve all sports in the best possible way.

Scenario #3 – Side Bar in sport volunteer application

Initial assumption:

Users need to know application and who are sport volunteers. They can get all the information about this by clicking the necessary buttons.

Normal:

Sport volunteer application's home page is well designed for active and member of application. However, If Users are new, they can learn all information by using the sidebar. Ziya is new and opened the application. He views all events and observes these events. However, he doesn't know anything about practice, for example what is his mission on these kinds of events, or it is difficult or easy how much approximately spend time for one event. Because he doesn't attend any volunteer events. However, he can learn any information from the sections in the sidebar. The sections have very clear explanations. After deciding being member of sport volunteer, They can sign-up directly in the sidebar. After they can follow scenario-1 and they can join events and education.

What can go wrong:

In this scenario, only situation can be wrong maybe sign-up and sign-in part. He/she wants to directly be a member of sport volunteer. Therefore, when in sign-in and sign-up section, internet must be consistent. If the internet connection is bad, maybe we cannot take e-mail and password safely. There will be only problem here which is going to be mistake.

Story #2 – Admin and Manager of Sport Volunteer

Şenol Güneş is a President of Youth and Sports Volunteers Association. Sport Volunteers organizes the events or the educations for volunteers.

He wants to see list of managers, volunteers, current or past event and also, volunteers information.

He can make updating, adding managers, events and educations in the admin panel. Volunteers can see the all of events and educations with updates and additions. They can apply them along with these.

Şenol Güneş must be able to filter the managers, the volunteers and the educations in admin panel. He should be able to see the details of the events and educations and delete them if he wishes.

And also, the added sub-managers also needs to be able to organize events and educations. They have the ability to delete, update and add them.

Scenario #1 Home page of Sport Volunteer Admin Panel

Initial assumption: Admin or managers are signed in to admin panel.

Normal: Admin clicks the home page in menu, then see all of the managers. Click detail of them, then a detail page of the manager will be open. And also, admin can add a new manager if click the "Add". In this case, the manager can log-in. If admin wants to delete them, he clicks the delete button. In this case, the manager cannot log-in.

Admin can want to see information of managers with filter. Admin can filter the manager's information according to the desired criteria such that username, name, surname, e-posta, tel-no etc. The sub managers registered in the system by admin cannot see anything when they click on the home page. The home page is only for the admin.

Scenario #2 Volunteer page of Sport Volunteer Admin Panel

Initial assumption: Admin or managers are signed in to admin panel.

Normal: Admin and manager click the volunteer page in menu, then see all of the registered volunteers. If they can see details of them, click detail button and opens it. Volunteer's information is listed in details page.

They want to see information of volunteers with filter. They can filter the volunteer's information according to the desired criteria such that username, name, surname, e-posta, tel-no etc.

Admin and managers can blacklist volunteers who do not come to the event if they clicks blacklist button. In this case, blacklisted volunteers cannot be included in the event when they apply at other events.

Scenario #3 Events page of Sport Volunteer Admin Panel

Initial assumption: Admin or managers are signed in to admin panel.

Normal: Admin and managers click the events page in the menu, then see all of the events. Click detail of them, then a detail page of the events will be open. They can add a new event if they click "Add". They give a information such that title, explanation, situation, end date and start date about event to be held. They can update the added events later.

They want to see information about the events with filter. They can easily filter the event's information according to the desired criteria such that title, explanation, situation, end date and start date.

And also, they can delete the events and they can see the volunteers who applied for the event. In this page, they can accept or reject volunteers who apply to the event.

Scenario #4 Education page of Sport Volunteer Admin Panel

Initial assumption: Admin or managers are signed in to admin panel.

Normal: Admin and manager click the education page in menu, then see all of the education that they are listed. If they want to see details of them, click detail button and opens it. Education's information is listed in details page.

Admin and managers can delete the course through the delete icon.

if managers wants to see of students that registered to course they can touch to registered people button(human figure icon) and. They can filter the students according to the desired criteria such that username, name, surname, e-posta, tel-no etc.

After seeing the students they can reject or accept students and they can see the users informations.

NOTE: what can go wrong: We thought about all the mistakes. We added the possible errors to our test cases.

UML Diagrams

1.Context Model

2.Process Model

3. Use case Diagrams

4. Use cases

System	Sport Volunteer (Mobile application)
Use Case	Applying and not Applying event
Actors	Sport volunteer (Participant)
Description	Sport volunteers want to apply an event to become a participant. Application needs some information about requirement of event. Some events need extra information like photo, knowledge of foreign language. According to this information requirement volunteer must fill in account information to apply event. If volunteer is not member of mobile application, they have to sign-up or sign-in to the mobile application. After applying the event and taken approvement from administration of the sport volunteers, they can join the event and experience.
Data	Information of requirement of events must be filled by volunteers in account information area in mobile application
Action	Volunteers clicks the apply button on event page in mobile application

System	Sport Volunteer (Mobile application)
Use Case	Applying and not Applying education
Actors	Sport volunteer (Participant)
Description	Sport volunteers want to apply an education to become a participant of that education. Application needs some information about requirement of education. According to this information requirement volunteer must fill in account information to apply education. If volunteer is not member of mobile application, they have to sign-up or sign-in to the mobile application. After applying the education and taken approvement from administration of the sport volunteers, they can join the education.
Data	Information of requirement of education must be filled by volunteers in account information area in mobile application
Action	Volunteers clicks the apply button on education page in mobile application

System	Sport Volunteer (Mobile application)
Use Case	Taking notification
Actors	Sport volunteer (Participant)
Description	Sport volunteers receive notification about all changes about events or educations which is already applied. Also, Sport volunteers receive notification of adding event or finishing event. Thanks to this notification sport volunteers have informed directly with using mobile application.
Data	Only requirement for taking notification is sign-up or sign-in
Action	# No action requires

System	Sport Volunteer (Mobile application) or (Admin Panel)
Use Case	Viewing events
Actors	Sport volunteer (Participant) and admin and managers of sport volunteer
Description	Opened and active events are visible for Sport volunteer. The other events like closed events or finished events not listed to sport volunteers. However, all events are visible for admin and managers of sport volunteer. They can list events and filtered the events.
Data	# There is no information needed. The only think they can enter mobile application or admin panel.
Action	# No action requires

System	Sport Volunteer (Mobile application) or (Admin Panel)
Use Case	Viewing educations
Actors	Sport volunteer (Participant) and admin and managers of sport volunteer
Description	<p>Opened and active education are visible for Sport volunteer. The other educations like closed education or finished educations are not listed to sport volunteers. However, all educations are visible for admin and managers of sport volunteer.</p> <p>They can list educations and filtered educations.</p>
Data	# There is no information needed. The only think they can enter mobile application or admin panel.
Action	# No action requires

System	Sport Volunteer (Mobile application) or (Admin Panel)
Use Case	Arrange account information
Actors	Sport volunteer (Participant) and admin and managers of sport volunteer
Description	<p>The account information is available if the sport volunteers are signed-up or signed-in to mobile application. They can arrange their information on the page of account information. Admin and manager don't have to be signed-up. because the admin can be created by developer team directly. The manager can be created by admins.</p>
Data	All information must be filled and click the button of update information
Action	Click update information button

System	Sport Volunteer (Admin Panel)
Use Case	Adding participant to blacklist
Actors	Admin and manager
Description	<p>Admins and managers can put volunteer to blacklist that do not come to events. It is against the volunteer. Because if volunteers is in blacklist, they can not join other events. These volunteers are seen from admin panel. these volunteers cannot join to events in this situation.</p> <p>The main reason of blacklist is; if volunteers do not attend to an event, they are put in blacklist.</p>
Data	Applications list of sport volunteers
Action	Click blacklist button

System	Sport Volunteer (Admin Panel)
Use Case	Approve application of participant
Actors	Admin and manager
Description	<p>Volunteers can apply educations and events. However, these applications must be approved by admins or managers. Admins and managers can approve sport volunteers' applications in admin panel. This improvements generally depends on sport volunteer's information. For example, some events need high level English. According to these, managers and admins choose appropriate participant.</p>
Data	Applications list of sport volunteers
Action	Click the confirmation button

System	Sport Volunteer (Admin Panel)
Use Case	Create and delete manager
Actors	Admin
Description	<p>Only admins can create a new manager in the admin panel. They give only username, e-mail, default password information for new managers. The managers can update this information by entering the admin panel. Also, they can add phone-no, photo, address etc. information rather than this information.</p> <p>Admins also can delete the managers in the admin panel. The managers deleted by the admins cannot log in to the admin panel.</p>
Data	E-mail, username, default password information for new manager.
Action	Click Add button and Delete button

System	Sport Volunteer (Admin Panel)
Use Case	Filtering events
Actors	Admin and manager
Description	<p>Admin and manager can see the events in the admin panel by filtered criteria. These criteria are title, explanation, situation, start and end date. Admin and manager can list according to way that they want to filter.</p>
Data	Title, explanation, situation, start and end date of events.
Action	Click Search button

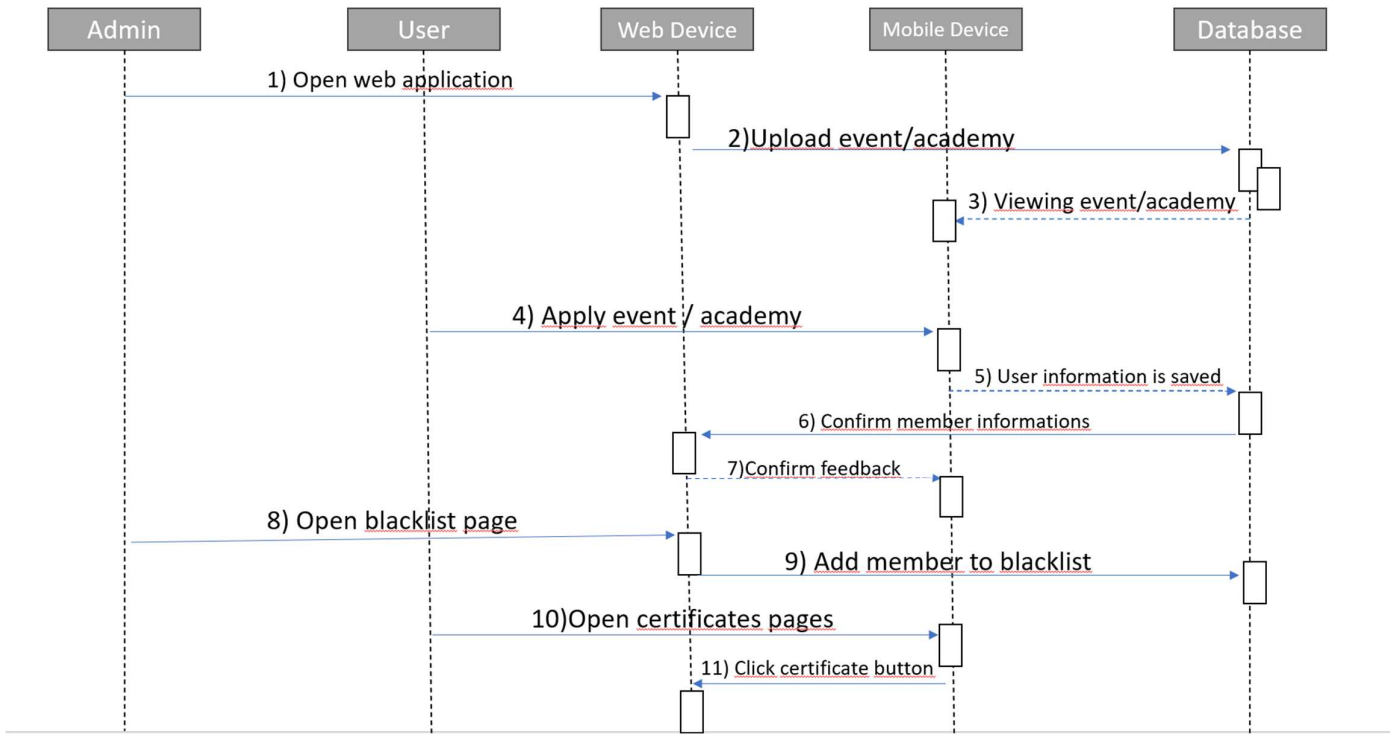

System	Sport Volunteer (Admin Panel)
Use Case	Filtering educations
Actors	Admin and manager
Description	Admin and manager can see the educations in the admin panel by filtering criteria. These criteria are title, explanation, situation, start date, end date and educator. Admin and manager can list according to way that they want to filter.
Data	Title, explanation, situation, start date, end date and educator of educations.
Action	Click Search button

System	Sport Volunteer (Admin Panel)
Use Case	Create and delete education
Actors	Admin and manager
Description	Admin and manager can create a new education in the admin panel. The requirements are title, photo, explanation, start date, end date, situation, educator. Also, admin and manager can delete educations.
Data	Title, photo, explanation, start date, end date, situation, educator of education.
Action	Click Add button and Delete button

System	Sport Volunteer (Admin Panel)
Use Case	Create and delete event
Actors	Admin and manager
Description	Admin and manager can create a new event in the admin panel. The requirements are title, photo, explanation, start date, end date, situation and location. Also, admin and manager can delete event.
Data	Title, photo, explanation, start date, end date, situation and location of education.
Action	Click Add button and Delete button

System	Sport Volunteer (Admin Panel)
Use Case	Listed participant (Sport volunteer)
Actors	Admin and managers
Description	Admin and manager can list all sport volunteer. They can view detail information of sport volunteers individually. Informations are username, name, surname, e-mail, phone-no, address, gender, birthday, authority.
Data	# There is no information needed.
Action	# No action requires

Test Case ID	MA1	Test Case Description	Home screen (mobile application)		
Created By	Ziya Kadir TOKLUOGLU		Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	25.11.2023	Test Case (Pass/Fail/Not Executed)	Not Executed
----------------------	----------------------	--------------------	------------	---	--------------

S #	Prerequisites:
1	Receiving photos from server
2	Notification symbol shows how many notification
3	Bottom bar and their symbol must be functional
4	Sidebar opening

S #	Test Data (Action)
1	Direct opened when clicked the main page from any where
2	Changing and uploading the event information for observation notifications counter
3	While clicking bottom bar icons open their page
4	Sidebar is opened when we click according to users information

Test Scenario	Opened the main page and all button and function visible and functional
----------------------	---

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	The picture of events is visible or not and making difference from admin is also visible for users	Pictures are visible and active button for looking event	As expected,	Pass
2	Notification icon and its counter shows true number and notification.	Shows how many notifications and notifications itself	As expected,	Not Executed
3	Bottom Bar icons their functionality like when clicking open relative page or returning home page from other page	Opened relative page or returning home page	As expected,	Pass
4	Sidebar opening when clicking according to users' information about login. If user's login the applications they don't see sign up or sign in only use sign out another feature of sidebar but if they don't login then they see sign up and sign in also some other feature of sidebar.	Sidebar opened relativity situation of the user about login	As expected,	Pass

Test Case ID	MA2	Test Case Description	Event page (mobile application)	
Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	26.11.2023	Test Case (Pass/Fail/Not Executed)	Pass
---------------	----------------------	-------------	------------	------------------------------------	------

S #	Prerequisites:
1	Showing all information about event
2	Scroll of text
3	Active apply button

S #	Test Data (Action)
1	Information is admin uploaded in admin panel
2	# no data required
3	Users information in app

Test Scenario	Users click the event and opened page they read all information about event and if they want to apply you can directly
----------------------	--

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Showing all information like time, location, actual role of event etc.	Observing the same information with information admin loaded.	As expected,	Pass
2	If the event definition long they can scroll the text without changing position of pictures of event and apply button	Shows how many notifications and notifications it self	As expected,	?
3	Before the apply button, we must check their information if all information is enough for event they can apply directly. Or show some message	If all information is valid and enough shows successful output	As expected,	Pass
		If all general information is not valid, shows the message about uploading the information.		Pass
		If all general information is valid but event also need some necessary information, then shows other message to upload addition information.		Pass

Test Case ID	MA3	Test Case Description	Sign in (mobile application)	
Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	26.11.2023	Test Case (Pass/Fail/Not Executed)	Pass
---------------	----------------------	-------------	------------	------------------------------------	------

S #	Prerequisites:
1	E-Posta
2	Password

S #	Test Data (Action)
1	Correct E-Posta and password
2	Correct E-Posta and wrong password
3	Controlling the valid user

Test Scenario	Verify user inputs and controlling the information.
---------------	---

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Controlling valid user or not if it is not made direct the sign-up page	Direct sign-up page	As expected,	Pass
2	Controlling the E-Posta is true password is wrong, but password is wrong then make direct the forget password option.	Direct forgotten page	As expected,	Pass
3	Controlling counter of trying the sign-in is more than 5 paused process for 5 minutes	Block the login process	As expected,	Pass
4	All information corrects. make direct to main page	Successfully login	As expected,	Pass
5	The user login and did not sign-out then show the message already login in	Shows message	As expected,	Pass

Test Case ID	MA4	Test Case Description	Sign up (mobile application)	
Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	28.11.2023	Test Case (Pass/Fail/Not Executed)	Pass
---------------	----------------------	-------------	------------	------------------------------------	------

S #	Prerequisites:
1	E-Posta
2	Password

S #	Test Data (Action)
1	Correct E-Posta and password
2	Correct E-Posta and wrong password
3	Already exist mail

Test Scenario

Verify user inputs and controlling the information.

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Already exist mail then make direct to sign-in page	Direct sign-in page	As expected,	Pass
2	Controlling mail format like string@domain.com	if it is wrong then don't accept	As expected,	Pass
3	Controlling password with uppercase and lower case briefly (password format)	if it is wrong then don't accept	As expected,	Pass
4	Controlling the again password is same as	if it is wrong then don't accept	As expected,	Pass

Test Case ID	MA5	Test Case Description	General information 1 (mobile application)	
Created By	Ziya Kadir TOKLUOGLU		Version	1.0

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	30.11.2023	Test Case (Pass/Fail/Not Executed)	Pass
---------------	----------------------	-------------	------------	------------------------------------	------

S #	Prerequisites:
1	User's name
2	User's surname
3	User's nickname

S #	Test Data (Action)
1	Including all alphabetical character and not alphabetical character word
2	Including all alphabetical character and not alphabetical character word
3	Including all alphabetical character and not alphabetical character word

Test Scenario	Update user information
---------------	-------------------------

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Controlling the name includes only alphabetical character	Valid entry	As expected,	Pass
2	Controlling the surname includes only alphabetical character	Valid entry	As expected,	Pass
3	Controlling the nickname includes only alphabetical character	Valid entry	As expected,	Pass
4	Controlling the name includes not only alphabetical character	Not Valid entry, give error message like “please enter valid entry”	As expected,	Pass
5	Controlling the surname includes not only alphabetical character	Not Valid entry, give error message like “please enter valid entry”	As expected,	Pass
6	Controlling the nickname includes not only alphabetical character	Not Valid entry, give error message like “please enter valid entry”	As expected,	Pass

Test Case ID	MA6	Test Case Description	General information 2 (mobile application)	
Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	5.12.2023	Test Case (Pass/Fail/Not Executed)	Pass
----------------------	----------------------	--------------------	-----------	---	------

S #	Prerequisites:
1	User's E-Posta
2	User's phone number
3	User's gender

S #	Test Data (Action)
1	Normal string, and actual email (according to e mail format)
2	Some number and actual phone number format
3	# no data require only choosing option

Test Scenario	Update user information
----------------------	-------------------------

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Controlling the E-Posta address according to this format (string@domain.com) if it is correct	Valid entry	As expected,	Pass
	If it is not	Not Valid entry, "Please enter valid e-mail"	As expected,	Pass
2	Controlling the phone number according to this format (area code- 3digit- 3digit - 2digit- 2digit) if it is correct	Valid entry	As expected,	Pass
	If it is not	Valid entry "Please enter valid phone number"	As expected,	Pass
3	Controlling gender is selected if selected or not selected it is ok	Valid entry	As expected,	Pass

Test Case ID	MA7	Test Case Description	General information 3 (mobile application)	
Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	5.12.2023	Test Case (Pass/Fail/Not Executed)	Pass
---------------	----------------------	-------------	-----------	------------------------------------	------

S #	Prerequisites:
1	User's date of birth
2	User's city where you live
3	User's district where you live

S #	Test Data (Action)
1	Valid and not valid input for format (day, month, year)
2	Valid city in turkey and not valid
3	Valid district in turkey and not valid

Test Scenario	Update user information
----------------------	-------------------------

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Controlling the date of birth address according to (day, month, year) (2digit-2digit-4digit) if it is correct	Valid entry	As expected,	Pass
	If it is not	Not Valid entry, "Please enter valid e-mail"	As expected,	Pass
2	Controlling the city in Turkey if it is correct	Valid entry	As expected,	Pass
	If it is not	Not Valid entry "Please enter valid city in TURKEY".	As expected,	Pass
3	Controlling the district in Turkey if it is correct	Valid entry	As expected,	Pass
	If it is not	Not Valid entry "Please enter valid district according to city in TURKEY".	As expected,	Pass

Test Case ID	MA8	Test Case Description	Specific information (mobile application)	
Created By	Ziya Kadir TOKLUOGLU	Version		1.0

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested		Test Case (Pass/Fail/Not Executed)	Not executed
---------------	----------------------	-------------	--	------------------------------------	--------------

S #	Prerequisites:
1	Photo
2	Foreign language
3	

S #	Test Data (Action)
1	Any photo in format (common format like jpeg)
2	Actual language name for mother language and foreign language part
3	

Test Scenario	Update user information
----------------------	-------------------------

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Uploading photo from device	Photo must be saved database.	As expected,	Not executed
2	Controlling the input is valid language in the world.	Valid entry	As expected,	Not executed
	If it is not	Not Valid entry "Please enter valid language".	As expected,	Not executed
3	Controlling the input is valid language in the world.	Valid entry	As expected,	Not executed
	If it is not	Not Valid entry "Please enter valid language".	As expected,	Not executed

Test Case ID	MA9	Test Case Description	Reset the password (mobile application)	
Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested		Test Case (Pass/Fail/Not Executed)	Not executed
---------------	----------------------	-------------	--	------------------------------------	--------------

S #	Prerequisites:
1	E-Posta
2	Password
3	

S #	Test Data (Action)
1	Any email address with format (string@domain.com) and not formatted
2	Valid password and not valis password
3	

Test Scenario	Reset the password which is forgotten
----------------------	---------------------------------------

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Controlling the password and again password is the same if it is same	Valid entry	As expected,	Not executed
	If it is not	Not Valid entry "Please make sure password is same".		Not executed
2	Controlling password format according to rule of password upper and lower case. If it is valid	Valid entry	As expected,	Not executed
	If it is not	Not Valid entry "Please enter valid password according to password rules".	As expected,	Not executed
3	Controlling E-Posta format (string@domain.com) If it is valid	Valid entry	As expected,	Not executed
	If it is not	Not Valid entry "Please enter valid E-Posta address".	As expected,	Not executed

Test Case ID	MA10	Test Case Description	Connection the database (mobile application) Sign-up, Sign-in	
Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	6.12.2023	Test Case (Pass/Fail/Not Executed)	Pass

----------------------	-----------------	--------------------	--	---	---------------------

S #	Prerequisites:
1	The user must be logged into the admin panel.
2	User should go to "Etkinlikler/Etkinliğe başvuran kişiler".

S #	Test Data
1	Search Term: Gender
2	

Test Scenario	The tester will use the search functionality to filter events by name and confirm that only the events with the specified gender are shown.
----------------------	---

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Locate the search box on the 'Etkinlikler/Etkinliğe başvuran kişiler' page.	Search bar should be brighter	As Expected	Not Executed
2	Enter the search term "Cinsiyet" into the search box.	User must be write the correct data	As Expected	Not Executed
3	Click the 'Ara' button or press Enter.	The correct datas must be listed on screen	As Expected	Not Executed

Test Case ID	AP64	Test Case Description	To verify that the search functionality on the 'Etkinlikler/Etkinliğe başvuran kişiler' tab filters events based on the given "Adres" section.	
Created By	Denizhan YILDIZ		Version	1.0

Tester's Name	Denizhan YILDIZ	Date Tested		Test Case (Pass/Fail/Not Executed)	Not Executed
----------------------	-----------------	--------------------	--	---	---------------------

S #	Prerequisites:
1	The user must be logged into the admin panel.
2	User should go to "Etkinlikler/Etkinliğe başvuran kişiler".

S #	Test Data
1	Search Term: "İstanbul"
2	

Test Scenario	The tester will use the search functionality to filter events by name and confirm that only the events with the specified adress are shown.
----------------------	---

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Locate the search box on the 'Etkinlikler/Etkinliğe başvuran kişiler' page.	Search bar should be brighter	As Expected	Not Executed
2	Enter the search term "Adres" into the search box.	User must be write the correct data	As Expected	Not Executed
3	Click the 'Ara' button or press Enter.	The correct datas must be listed on screen	As Expected	Not Executed

Test Case ID	AP65	Test Case Description	To verify that the search functionality on the 'Etkinlikler/Etkinliğe başvuran kişiler' tab filters events based on the given "Yetki" section.	
Created By	Denizhan YILDIZ		Version	1.0

Tester's Name	Denizhan YILDIZ	Date Tested		Test Case (Pass/Fail/Not Executed)	Not Executed
----------------------	-----------------	--------------------	--	---	---------------------

S #	Prerequisites:
1	The user must be logged into the admin panel.
2	User should go to "Etkinlikler/Etkinliğe başvuran kişiler".
3	

S #	Test Data
1	Search Term: "Yönetici"/"Admin"
2	
3	

Test Scenario	The tester will use the search functionality to filter events by name and confirm that only the events with the specified authority are shown.
----------------------	--

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Locate the search box on the 'Etkinlikler/Etkinliğe başvuran kişiler' page.	Search bar should be brighter	As Expected	Not Executed
2	Enter the search term "Yetki" into the search box.	User must be write the correct data	As Expected	Not Executed
3	Click the 'Ara' button or press Enter.	The correct datas must be listed on screen	As Expected	Not Executed

Test Case ID	AP66	Test Case Description	Test events detail functionality page	
Created By	Müjgan OZAN	Version		1.0

Tester's Name	Müjgan OZAN	Date Tested		Test Case (Pass/Fail/Not Executed)	Not Executed
---------------	-------------	-------------	--	------------------------------------	--------------

S #	Prerequisites:
1	Access to Chrome Browser
2	Online Internet

S #	Test Data
1	Full data of example event
2	Missing data of example data

Test Scenario	Updating events details in event detail page
----------------------	--

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Enter the website to localhost:3000/ and login	Login page should open and log in correctly and redirects to home page	As Expected	Pass
2	Opening the manager information page	Manager information is listed.	As Expected	Pass
3	Click "Events" from the menu	Events page opens	As Expected	Pass
4	Click "Event edit" from the page	Event detail page opens	As Expected	Not Executed
5	Leave any field blank and click the save button.	Warning message "You left free space"	As Expected	Not Executed
6	Filling in all fields and pressing the save button	Warning "Event information has been changed".	As Expected	Not Executed

Test Case ID	AP67	Test Case Description	Test events photo functionality in events edit page

Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	10.12.2023	Test Case (Pass/Fail/Not Executed)	Pass
---------------	----------------------	-------------	------------	------------------------------------	------

S #	Prerequisites:
1	Internet connection
2	Database connection
3	Listed data about educations

S #	Test Data (Action)
1	T/F information for title of education
2	T/F information for explanation of education
3	T/F information for educator of education
4	T/F information for situation of education as open or close
5	T/F information for start and end date of education.

Test Scenario Filtering the all educations according to information which are title, explanation, educator, situation and start and end date

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Filtering the education according to title . If there are exist,	Shows educations	As expected,	Pass
	If there are not exist	Shows an empty list	As expected,	Pass
2	Filtering the education according to explanation . If there are exist,	Shows educations	As expected,	Pass
	If there are not exist	Shows an empty list	As expected,	Pass
3	Filtering the education according to educator . If there are exist,	Shows educations	As expected,	Pass
	If there are not exist	Shows an empty list	As expected,	Pass
4	Filtering the education according to situations . If there are exist,	Shows educations	As expected,	Pass
	If there are not exist	Shows an empty list	As expected,	Pass
5	Filtering the education according to start and end date . If there are exist,	Shows educations	As expected,	Pass
	If there are not exist	Shows an empty list	As expected,	Pass

Test Case ID	AP71	Test Case Description	Education page filtering in admin panel	
Created By	Ziya Kadir TOKLUOGLU	Version	1.0	

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested	11.12.2023	Test Case (Pass/Fail/Not Executed)	Pass
----------------------	----------------------	--------------------	------------	---	------

S #	Prerequisites:
1	Internet connection
2	Database connection
3	Listed data about educations
4	CD_020

S #	Test Data (Action)
1	Filter button action
2	Adding button action
3	Editing button action
4	Deleting button action
5	List participant button action

Test Scenario	Filtering all educations according to information which are title, explanation, educator, situation and start and end date
----------------------	--

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Filter button combines the filter option in CD_020. If there are exist.	Shows educations	As expected,	Pass
	If there are not exist	Shows an empty list	As expected,	Pass
2	Adding button make direct the page of adding education.	Opening the add education page	As expected,	Pass
3	Editing button make direct the page of edit education.	Opening the edit education page	As expected,	Pass
4	Deleting button make direct the pop up are you sure if sure then delete the education permanently	Deleted educations from list	As expected,	Pass
5	List the participants for relative educations	Listed participants	As expected,	Pass

Test Case ID	AP72	Test Case Description	Adding photo in page adding event admin panel	
Created By	Ziya Kadir TOKLUOGLU		Version	1.0

Tester's Name	Ziya Kadir TOKLUOGLU	Date Tested		Test Case (Pass/Fail/Not Executed)	Not Executed
----------------------	----------------------	--------------------	--	---	---------------------

S #	Prerequisites:
1	Internet connection
2	Database connection
3	

S #	Test Data (Action)
1	Saving the true photo with common format (jpeg etc.) to database (correctly)
2	Not Saving the different format photo
3	

Test Scenario	Selected photo from device and uploaded the photo to database
----------------------	---

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	The photo is uploaded to database properly and uploaded photo.	When clicked the button photo is uploaded from relative path in computer or internet	As expected,	Not Executed
2	Controlling the event photo in the mobile application is the same as uploaded photo according to relative event	Observing same photo or picture	As expected,	Not Executed

Test Case ID	AP73	Test Case Description	To validate that clicking the "Katılımcıları görüntüle" button (human figure icon) displays the details of the applicants for an education.	
Created By	Denizhan YILDIZ		Version	1.0

Tester's Name	Denizhan YILDIZ	Date Tested	08.12.2023	Test Case (Pass/Fail/Not Executed)	Pass
----------------------	-----------------	--------------------	------------	---	------

S #	Prerequisites:
1	User is logged into the admin panel.
2	User has navigated to the 'Eğitimler' tab.
3	There are existing applicants for events.

S #	Test Data
1	
2	
3	

Test Scenario	The tester will verify that upon clicking the human figure icon (which represents the "Katılımcıları görüntüle" button), the system displays a detailed list of all applicants for a specific education, including their personal information and application status.
----------------------	---

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Log into the admin panel.	"Anasayfa" should be open	As Expected	Pass
2	Navigate to the 'Eğitimler' tab.	"Eğitimler" tab should be open	As Expected	Pass
3	Identify an education with applicants.	User should be choose an education	As Expected	Pass
4	Click on the human figure icon associated with an education to view the applicants.	Applicants page should be open	As Expected	Pass

Test Case ID	AP74	Test Case Description	To confirm that clicking the red cross icon successfully rejects a volunteer's application.	
Created By	Denizhan YILDIZ		Version	1.0

Tester's Name	Denizhan YILDIZ	Date Tested		Test Case (Pass/Fail/Not Executed)	
----------------------	-----------------	--------------------	--	---	--

S #	Prerequisites:
1	User is logged into the admin panel.
2	User has navigated to the "Eğitimler" tab.
3	User has choose an education and must show the volunteer applicants.

S #	Test Data
1	
2	
3	

Test Scenario	The tester will attempt to reject a volunteer application and verify that the application is no longer listed as pending or accepted.
----------------------	---

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Identify a volunteer application with a red cross icon next to it.	User must choose an volunteer that reject	As Expected	
2	Click on the red cross icon corresponding to a specific volunteer.	The application of the selected volunteer is marked as rejected.	As Expected	
3				

Test Case ID	AP75	Test Case Description	To ensure that clicking the green tick icon changes the status of the volunteer's application to accepted.
